Top 10 Sellers with Highest Delivery Delay

Our groupby analysis reveals that while most sellers deliver early, the top 10 outlier vendors cause severe delays, with the worst averaging over 10 days late. These specific sellers heavily bottleneck platform performance

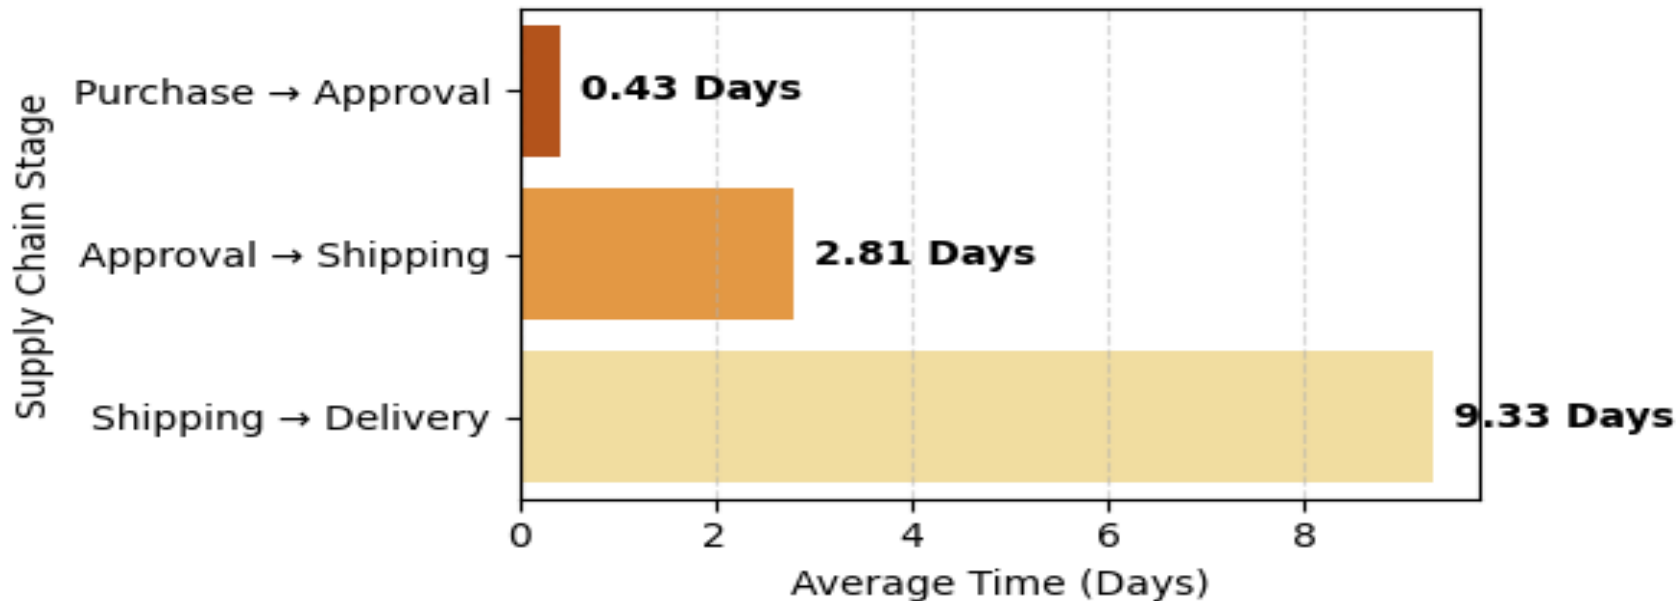

Impact of Delivery Delay on Review Scores

Delayed orders suffer a massive drop in customer satisfaction, with average review scores plunging from around 4.2 to 4.3 stars down to sub-2.5 stars .

Bottlenecks

Operational Bottlenecks: Where is the Delay Happening?

The operational breakdown proves that Shipping → Delivery (the transit phase managed by carriers) is the primary bottleneck, taking the largest chunk of time, while internal administration (Purchase → Approval) is completed in less than half a day, must decentralize its fulfillment centers closer to high-demand regions and phase out underperforming shipping partners
